

Jim Horning started programming in 1959, and got his Ph.D. in Computer Science from Stanford in 1969. Since then he has been involved in academic and industrial research at the University of Toronto, Xerox PARC, DEC/SRC, InterTrust Technologies, McAfee Research, and now SPARTA, Inc. His long-term interest in the mastery of complexity (especially by linguistic means) has involved him in research on programming languages and compilers, grammatical inference, operating systems, programming methodology, formal specification and verification, and tools for electronic commerce in intellectual property. Recently his work has focused on computer and network security. He was a member of the NRC/CSTB Study Committee on Privacy in the Information Age (http://www7.nationalacademies.org/cstb/project_privacy.html).
